

# Suggestions for Space Usage

## ***BA 160 Former Technology Resource Center***

### Future Space Usage

**Considerations: Activity level; student focused; visibility of location; traffic patterns; may be a mid-term location in regards to time (five to ten years dependent on master plan); costs to renovate, must be low cost solutions unless an outside funding source is known; hvac considerations are that the space can get warm if occupied for multiple hours by a large number of individuals (estimated 30-50+ individuals over hours)**

*The Space Committee will review suggestions and forward recommendations to the President.  
\*Please complete form and submit to Deb Kerkaert at FH 215 or by email to Deb.Kerkaert@smsu.edu  
by Friday 11/18/2016*
