

Minnesota State Graduate Follow-Up Survey FY2025 Cohort

FY2025 Cohort includes awards earned July 1, 2024 through June 30, 2025

Pre-Award Collection Period is the time directly before the award is earned where institutions may collect GRFU data from students prior to earning an award. GRFU data cannot be collected through ARSA because ARSA only contains records of awards already earned.

Collection Period is the time when institutions contact a cohort and collect data. The collection period is one year after the end of the FY for the cohort and is the same for all awards earned in the same FY for the cohort.

Tracking Period is the time during which graduates' employment or continuing education must commence. The time is one year after the date the award was earned and is specific to the award, not the cohort. This is so that all awards are measured using the same measurement of "employment or continuing education within 12 months of earning award".

Post-Collection Period is the time after the collection period ends when institutions may enter GRFU data collected during the collection period but may not collect new GRFU data during this time.

Data Analysis and Report Generation Period is the time period after collection has ended and the System Office processes GRFU data and creates reports and databases for each institution.

		Student A earns award on July 15, 2024	Student B earns award on December 15, 2024	Student C earns award on May 15, 2025
