

GUEST WI-FI NETWORK

ATTENTION: Please note that administrative privileges are required on your computer to complete this process.

1. Click an **Action Center** icon on your taskbar (network, sound, and power icons located to the left of the time and date) to open the **Quick Settings** menu.

2. Select the **Manage Wi-Fi Connections** button (top left) in the **Quick Settings** menu.

3. Select the **SMSU Network OnRamp** and connect

4. After you have selected the **SMSU Network OnRamp**, open a new webpage on your browser (For example on Google Chrome or Mozilla Firefox), and go to <https://onramp.smsu.edu>. The New Webpage will display a Welcome message and you will have to **Agree to the Terms and Conditions** and then click **Start**.

5. Select **Guest**

SOUTHWEST
MINNESOTA STATE UNIVERSITY

StarID **StarID Logon**
SMSU registered StarID users only. Other campus StarID must use Guest.

Guest **Guest Logon**
Campus guest self registration and pre-registered voucher logon.

Vendor **Vendor Logon**
Vendors with StarID should select the StarID option instead of this option. Vendors without StarID that have domain credentials should select this option. Vendors without any domain credentials should select Guest.

6. Select **Guest Self Registration**

MINNESOTA STATE UNIVERSITY

To access the secure network, follow the instructions below based on your computer's operating system.

Microsoft Windows

Download .exe for Windows

NetworkWizardLoader-95c4b84d.exe

After downloading, go to your desktop or downloads folder and open the file "NetworkWizardLoader-95c4b84d.exe".

[Show all operating systems.](#)

The screenshot shows a web browser's download manager interface. The browser's address bar and navigation icons are visible at the top. The download manager is open, displaying a list of downloaded files. The file 'NetworkWizardLoader-95c4b84d.exe' is listed with a file icon and a blue 'Open file' link. Below the file list, there is a 'See more' link. The background of the browser window shows the same Southwest Minnesota State University network access page as in the previous image.

10. If asked if you want to run/allow the file, select **Run/Allow**, then select **Yes** to the Security Warning you may receive. Follow the instruction given for your device.
11. The Cloudpath application should start running on your device

12. Cloudpath configures your device to automatically connect to the SMSU network, and it should successfully connect to the network. When you receive the following window, then your Wi-Fi connection to the SMSU is ready. You can click Done and start using your internet connection.

13. Some devices do not automatically connect to the SMSU Network to complete the setup, and it will require the users to manually connect to the SMSU network. When the message on the Cloudpath window displays Attempting to connect to the network for some time, click on the Wireless icon on your laptop taskbar, and under SMSU, click on Connect.

14. You should then receive the following, which shows that your Wi-Fi connection to the SMSU network is ready.
