

Windows Updates

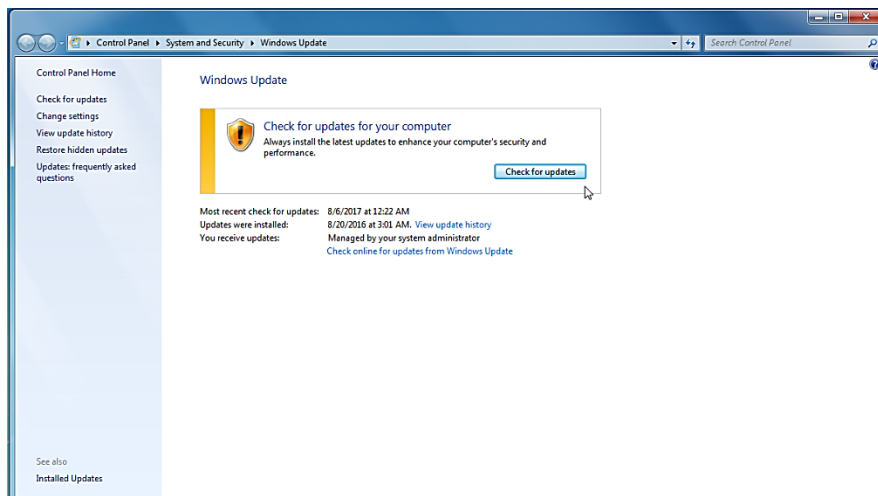

Windows 7 / Windows 10

1) Windows 7

- a) Go to the *Start* screen (press the *Windows* button on your keyboard or drag your mouse to the lower left corner of your screen and click on the *Windows icon*), and type *Windows Update* in the Search bar. When it pops up in the program list, click on it.

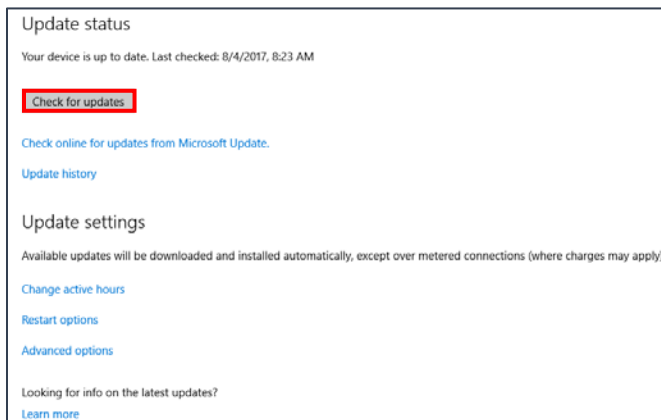

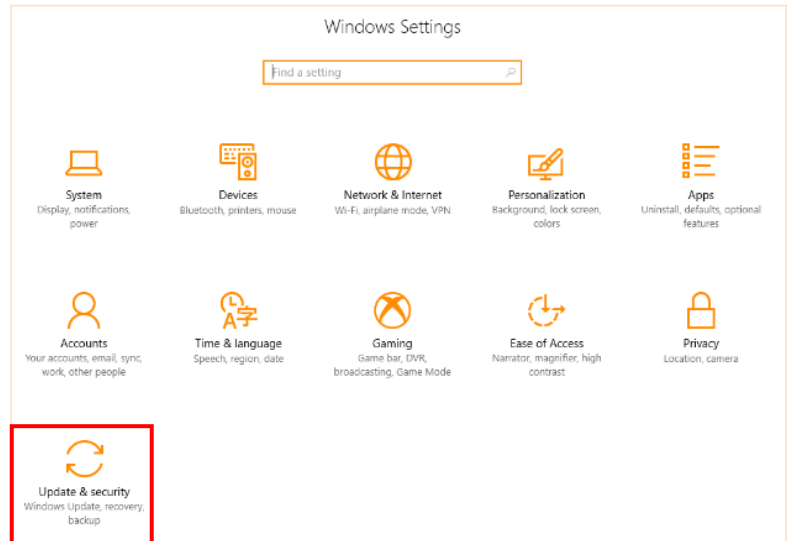

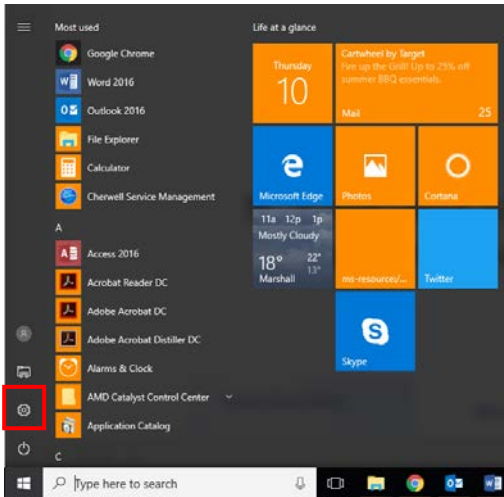

- a) Once on the Windows Update screen, click on *Check for updates*. If there are any updates available for your computer, click on *Install Updates*.

2) Windows 10

- a) Go to the Start screen and click on *Settings* (the gear icon above the power icon on the left), then click on *Update & Security*.

- b) Once on the Windows Update screen, click on *Check for updates*. If there are any updates available for your computer, click on *Install Updates*.
- 3) After the updates install, reboot your machine and check again for updates in case there might be new ones.
- 4) If an update fails, restart your computer and try again to update. Try installing one update at a time instead of multiple together so you can see which one fails. If it does not work, do not hesitate to contact the Technology Resource Center for assistance.
